No-Scratch®
Product Line

Why Sportworks® ?

We love bikes. Always have, always will. When we set out to redesign bike parking, we saw a lot of opportunity to create products that are functional and design-minded. This had been a marriage that seemed to be missing in the market. Luckily for us, we create products that resonate with people who ride bikes and design professionals alike. Because we do things differently, we want to explain a bit about our products and the materials that we use.

SANTOPRENE™ is a thermoplastic compound that is manufactured through processes similar to plastic, but different in that Santoprene™ behaves like rubber compounds with high levels of flexibility and durability, along with excellent longevity in both heat and cold. We needed something that is vandal resistant, but still had a soft touch that is friendly toward bikes. We chose it for our No-Scratch® line of products for these reasons. Additionally, Santoprene™ is 100% recyclable, so it fits well into our environmental commitment.

304 GRADE STAINLESS STEEL is our preferred metal of choice to use for our bike parking products. For years, the market has been told a story that stainless steel has to be prohibitively expensive. We didn't agree and set out to change that narrative. And we have. Our bike racks are becoming the preferred choice for municipalities, developers, advocates and architects around the country because of the blend of durability, functionality and design. Can we still manufacture that purple powder-coated or galvanized rack? We sure can, but we're pretty confident that once you see our pricing on stainless and figure out the total cost of ownership for the powder-coated and galvanized racks that you have been using, you will join the shift to Sportworks®.

Give us a call on your next project. We're transforming bike parking and we would love to have you along for the ride.

modern.

Specifications

- 304 Grade Stainless Steel with Santoprene™ bumper (**also available in mild steel**)
- 12 day lead time
- Surface/in-ground mounting options
- 2 bike capacity
- Patented design
- 100% recyclable materials
- Ability to lock frame and wheel
- Listed with Declare (www.declareproducts.com)
- Dimensions: 28"x33"
- Made in USA

bike friendly.

Specifications

- 304 Grade Stainless Steel with Santoprene™ bumper (**also available in mild steel**)
- 12 day lead time
- Surface/in-ground mounting options
- 2 bike capacity
- Patented design
- 100% recyclable materials
- Ability to lock frame and wheel
- Listed with Declare (www.declareproducts.com)
- Dimensions: 14.5"x33"
- Made in USA

versatile.

Specifications

- 304 Grade Stainless Steel with Santoprene™ bumper (**also available in mild steel**)
- 12 day lead time
- Sturdy mounting options
- 2 bike capacity
- Patented design
- 100% recyclable materials
- Ability to lock frame and wheel
- Dimensions: 36"x32"
- Made in USA

Plaza High Density
Product Line

Plaza High Density Double Sided Rack

3010 Series

"We cannot solve our problems with the same thinking we used when we created them."

-Einstein

sophisticated.

Specifications

- 304 Grade Stainless Steel (also available in mild steel)
- 15 day lead time
- Multiple mounting options
- 8 or 12 bike capacity
- Exclusive design
- 100% recyclable materials
- Ability to lock frame and wheel
- Dimensions: varied
- Made in USA

Plaza High Density Single Sided Rack

3012 Series

"More than any other emotion, melancholy is incompatible with bicycling."

- James E. Starrs

organized.

Specifications

- 304 Grade Stainless Steel (also available in mild steel)
- 15 day lead time
- Multiple mounting options
- 4 or 6 bike capacity
- Exclusive design
- 100% recyclable materials
- Ability to lock frame and wheel
- Dimensions: varied

Narrow ST Inverted U

3005 Series

"Irritability means too much on your mind and not enough bike riding." - bumper sticker

no compromise.

Specifications

- Stainless or mild steel
- Timeless design
- 12 day lead time
- Varied finishes
- 2 bike capacity
- Smaller, less obtrusive mounting feet
- 100% recyclable materials
- Dimensions: 35"x24"

Wide ST Inverted U

3006 Series

"Nothing compares with the simple pleasure of a bike ride."
-John F. Kennedy

functional.

Specifications

- Stainless or mild steel
- Modern, sophisticated design
- 12 day lead time
- Varied finishes
- 2 bike capacity
- Smaller, less obtrusive mounting feet
- 100% recyclable materials
- Dimensions: 35"x31"

Compact U Rack

3003 Series

"Brains before beauty, wear your helmet!" - Unknown

durable.

Specifications

- Mild steel
- Modern, compact design
- 12 day lead time
- Varied finishes
- 2 bike capacity
- Smaller, less obtrusive mounting feet
- 100% recyclable materials
- Dimensions: 14"x30"

Mounting Rails

3015 Series

"Ride as much or as little, or as long or as short as you feel. But ride." - Eddy Merckx

flexible.

Specifications

- Variety of mounting options and hardware including anti-theft solutions
- Allows for easier movement of racks if not secured to the ground for events, etc.
- Engineered, extruded aluminum provides the strength of steel, without having to worry about rust
- Versatility and adaptability based on site requirements (perpendicular or angled parking with any Sportworks U-Rack)
- 2-10 bike configurations per set of rails

Sign Plates

1009 Series

"A bicycle ride is a flight from sadness." - James E. Starrs, The Noiseless Tenor

branded.

Specifications

- Custom sign plates as well as standard designs available
- Pricing depends on design

Mounting Hardware

3000 Series

"Bicycles have no walls." - Paul Cornish

secure.

Specifications

- Variety of mounting hardware options for all of our products
- We will consult with you to determine the best hardware for your specific application

Josta® Bike Parking Products

Josta Series

"Life is like riding a bike. In order to keep your balance, you must keep moving."
-Albert Einstein

high density.

Specifications

- Patented wheel gripping mechanism
- Worldwide standard for high density bike parking
- Movable security bar
- Gas assisted cylinder to aid in lifting and lowering the rack
- Customized solutions
- Triple stacking options also available

Storage Lockers

Locker Series

"Truly, the bicycle is the most influential piece of product design ever." - Hugh Pearman

shelter.

Specifications

- Weatherproof, secure and adaptable
- Custom perforated patterns on the doors and sides
- Locking via standard U-lock, padlock or optional key lock
- Optional perforation designs with a logo or custom design
- Various sizes available
- Customization available

Bike Cages and Shelters

Covered Series

"Creativity is thinking up new things. Innovation is doing new things." - Theodore Levitt

covered.

Specifications

- Custom designed based on your site requirements
- LED and solar options available
- Various locking options available
- Integrated bike racks afford long term storage
- Adaptable for use indoors or outdoors

Deluxe Public Repair Stand

3002 Series

"Nothing says independence like a bicycle." - Unknown

sturdy.

Specifications

- Instruction label and QR code for repair help
- Aircraft cable secures eight common bicycle tools (some models with retractable cables)
- Thick walled DOM tubing is finished in galvanized, stainless steel, or powder coated
- Unique construction prevents bicycles from being locked to stand
- Several models and finishes available

HS Public Bike Pump

3002 Series

"It never gets easier, you just go faster." - Greg LeMond

helpful.

Specifications

- Completely sealed from the elements
- Custom cut resistant steel braided core air hose and dual valve pump head
- Proprietary piston and rod seal ensures a long service life
- Optional tool set tethered by stainless steel cable
- Several models and finishes available

HS Vending Machine

3002 Series

"Every time I see an adult on a bicycle I no longer despair for the future of the human race." -H.G. Wells

variety.

Specifications

- Rugged, built to withstand inside and outside conditions
- Internal heating and cooling elements
- Configured to accept all major payment methods including coins, bills, credit and stored value cards
- Ideal for low supervision or high crime areas
- Embedded telemetry to remotely monitor stock on hand

Great people.
Great products.

While last year was a great year, we are even more excited about the future. Cities and businesses across the country are recognizing the importance of providing amenities to people who ride their bikes as they are taking to the streets like never before and we are seeing commute rates via bike skyrocket. We're thrilled to be a key leader in this growing market and also excited about our recent product launches. Our Vertical+ rack quickly set the standard for vertical bike parking by providing the high density storage that architects and planners are looking for, while providing the innovative features that cyclists are longing for.

We continue to see exponential growth from our No Scratch® line of bike parking products as well as our Plaza series, but we're not stopping there. Our engineering team will be working hard to continue to provide innovative cycling infrastructure solutions at a competitive price. Lastly, we want to thank our customers – end users, architects, specifiers, advocates, planners, property managers and developers. You have realized that there is a better idea in bike parking and have helped us get the word out about our products. You have provided valuable feedback so that we can continue to refine our design process and consistently deliver innovative cycling infrastructure products to the market.

About Us

Our Story

Sportworks® has been designing and manufacturing bicycle products since 1990. We designed the industry's first Bike-Rack-for-Buses™ in 1993, and currently supply these transit racks to over 500 municipalities throughout North America. In 2011, we developed a line of stationary bike parking products including the innovative No Scratch® rack, the first bike rack with a fully integrated, non-abrasive bumper that protects bikes. Sportworks® transit racks are Buy America and all of our bike parking products meet the strict material sourcing criteria of the Living Building Challenge and LEED.

So what's the Sportworks® difference? We don't settle for the status quo! We are dedicated to the continual pursuit of improving the way bicycles, public transportation, and urban environments work together. We work hand-in-hand with customers to create innovative products and push what it means to be a company that lives by its core values. At Sportworks®, we're passionate about making the world more accessible to bicycling and are proud to offer thoughtful, well-engineered products that promote bicycling, healthy lifestyles and global sustainability.

Advocacy

Sportworks® has been involved with every aspect of bike-on-bus programs since inception. From bicycle advocacy, legislation, sourcing of federal funds, marketing, safety and maintenance; to the general operations of bike-on-bus programs in the transit environment, we regularly consult with transit agencies, community groups and bicycle advocacy organizations to continually meet their multi-modal needs.

Made in America

Our employees are passionate about producing exceptionally high quality and cost efficient products. All Sportworks® products are manufactured using state-of-the-art technology and proudly made in America.

“Design is a funny word. Some people think design means how it looks. But of course, if you dig deeper, it's really how it works.”
-Steve Jobs
