**Vertical+ and Vertical No Scratch®
Floor Mounted Daisychaining**

When daisychaining Vertical+ and Vertical No Scratch® rack modules, build each successive module so that the first bike support loop is height staggered relative to the adjacent loop in the prior module.

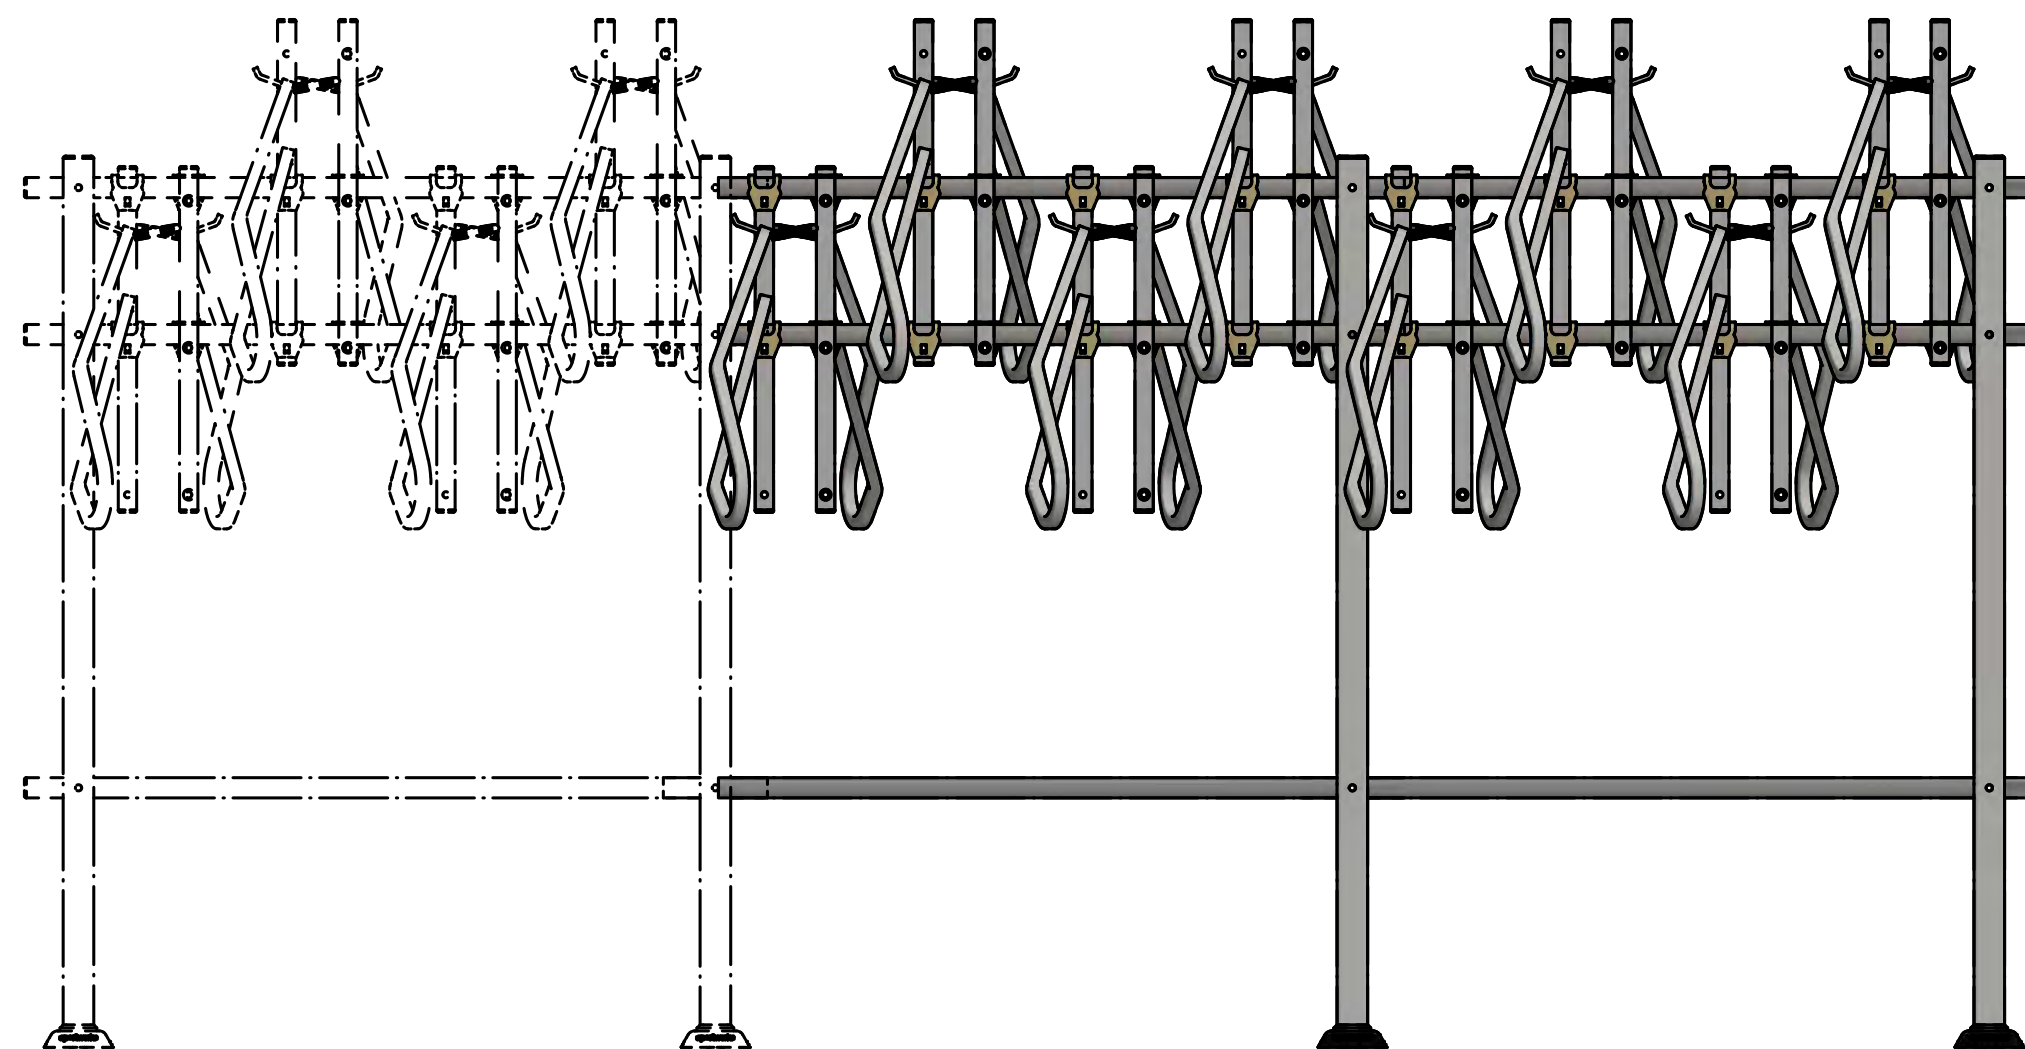

Part number explanation:

- Base modules have a B as the 5th digit of the part number and include two uprights and two feet
- Extension modules have an E as the 5th digit of the part number and include one upright and one foot

BASE

EXTENSION(S)

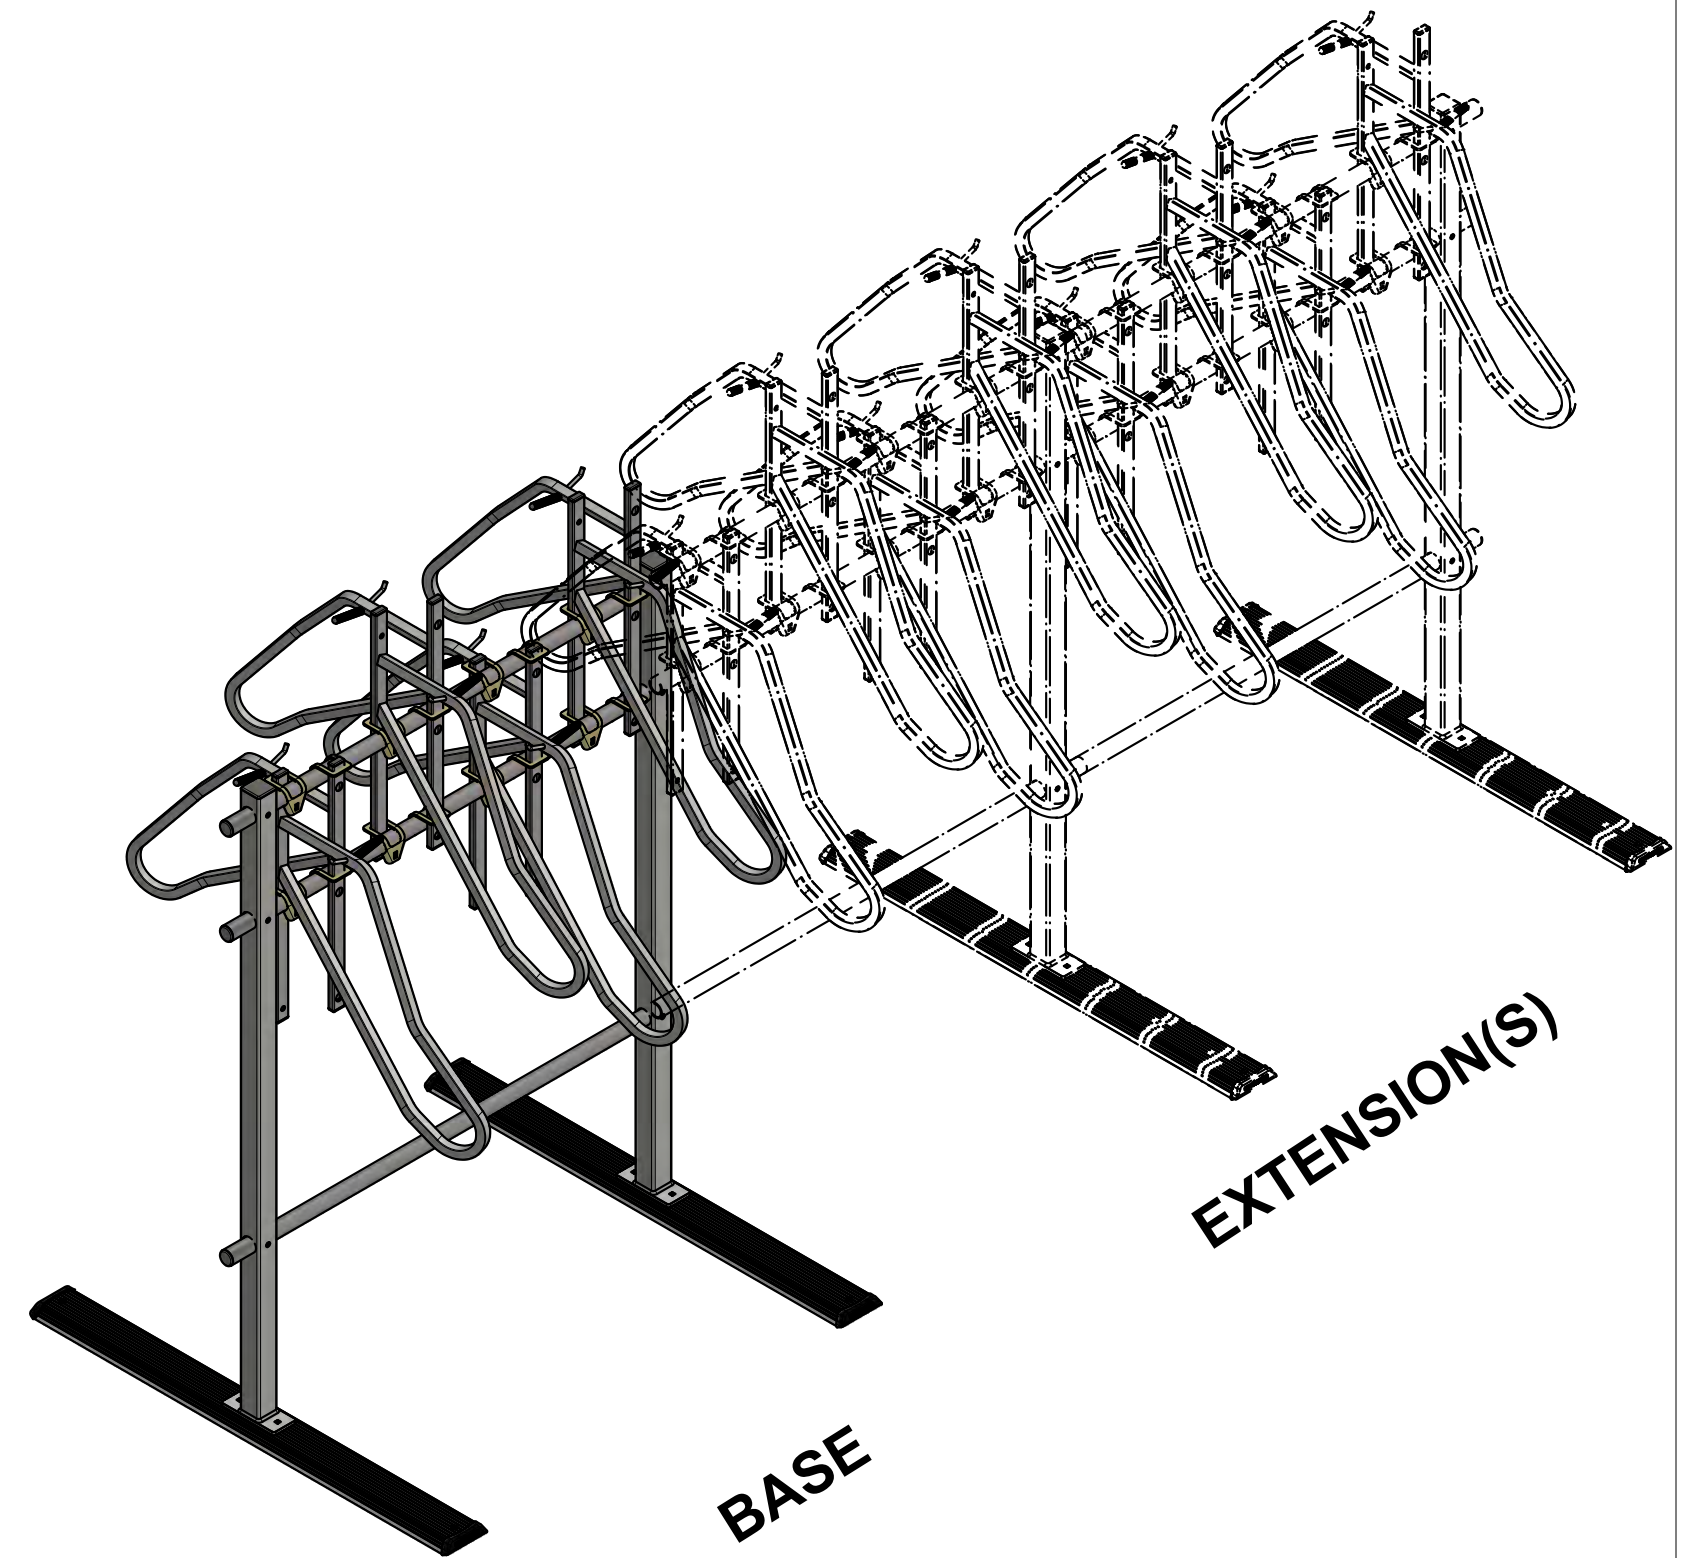

BASE

EXTENSION(S)

Vertical+ Double Sided Daisychaining

When daisychaining double sided vertical+ rack modules, modules will have 4 loops/side in each module to ensure loops are at staggered heights when installed.

BASE

EXTENSION(S)

Part number explanation:

- Base modules have a B as the 5th digit of the part number and include two uprights and two feet
- Extension modules have an E as the 5th digit of the part number and include one upright and one foot
