WHY SPORTWORKS?

We love bikes. Always have, always will. That’s why our racks are made by cyclists, for cyclists. When we set out to redesign bike parking, we saw an opportunity to create products that blend elegance with functionality. We take a calculated approach to our designs and to the materials we use. Below, you can learn more about the materials we use to produce the highest quality bike parking in the industry.

NO SCRATCH® bumper is a firm thermoplastic feature integrated into the bike rack to protect a user’s bike from being scratched. To produce a product superior to everything else on the market, we needed something that is vandal resistant, but still has a soft touch that is friendly toward bikes. That’s why we chose Santoprene™ and Polyurethane for the No-Scratch® line of bike parking racks. Both of these materials are manufactured with processes similar to hard plastics. The difference is that both Santoprene™ and Polyurethane behave more like rubber compounds, with high levels of flexibility and durability. With that, comes excellent longevity in hot and cold environments. As an added bonus, Santoprene™ is 100% recyclable, which is an important element in our dedication and commitment to the environment.

TYPE 304 STAINLESS STEEL is our metal of choice for use in manufacturing high quality bike parking products. For years, the market has been convinced that stainless steel has to be prohibitively expensive. Our team at Sportworks® didn’t agree and set out to change that perception. And we have. Our bike racks are considered the preferred choice for municipalities, developers, advocates and architects around the country because of the unique combination of durability, functionality and design that we’ve brought to the industry. Can we still manufacture a purple powder-coated or galvanized rack? Of course, but we are confident that our pricing on stainless steel, combined with the total cost of ownership versus the powder-coated and galvanized racks you’re used to, will convince you to join Sportworks® in the shift to stainless steel.

Contact us about your next project. Sportworks® is transforming the world one bike parking rack at a time and we would love to have you along for the ride.

MOUNTING RAILS

DESCRIPTION
• Allows for easier movement of racks if not secured to the ground for events, etc.
• Versatile and adaptable based on site requirements (perpendicular or angled parking with any Sportworks inverted u style rack)
• 6-10 bike configurations per set of rails

MOUNTING HARDWARE

DESCRIPTION
• Variety of mounting hardware options for all of our products
• We will consult with you to determine the best hardware for your specific application. Various mounting options can be explored on the right side of the page

MOUNTING OPTIONS

SURFACE MOUNT
This mount type uses mounting feet and appropriate hardware to anchor the rack to the ground. Sportworks recommends using tamper-proof hardware for greater security.

IN-GROUND MOUNT
The in-ground or embedded mount type requires the rack to be installed prior to placing the concrete.

RAIL MOUNT
Mounting rails allow racks to be grouped together and may be left freestanding or anchored to the surface to ensure they stay in place.

WALL MOUNT
Special mounting hardware will be required for various wall surfaces, concrete, drywall, etc. Our experts can assist you in selecting the right hardware for your installation.

TAMPER-PROOF HARDWARE
If the bike racks will be bolted to the surface, we recommend the use of breakaway nuts or other security hardware.
BIKE LOCKERS
**SINGLE BIKE LOCKER**

- **Capacity:**
  - 1 Bike

- **Security:**
  - ✔️

- **Dimensions:**
  - 76”L x 30”W x 47”H

- **Finish Options:**
  - Powder Coated
  - Custom Perforation
  - Stackable
  - Recyclable Materials: 100%
  - APBP Compliant
  - Made in USA

---

**DOUBLE BIKE LOCKER**

- **Capacity:**
  - 2 Bikes

- **Security:**
  - ✔️

- **Dimensions:**
  - 76”L x 39”W x 47”H

- **Finish Options:**
  - Powder Coated
  - Custom Perforation
  - Stackable
  - Recyclable Materials: 100%
  - APBP Compliant
  - Made in USA

**WEDGE BIKE LOCKER**

- **Capacity:**
  - 1 Bike

- **Security:**
  - ✔️

- **Dimensions:**
  - 76”L x 39”W x 47”H

- **Finish Options:**
  - Powder Coated
  - Custom Perforation
  - Stackable
  - Recyclable Materials: 100%
  - APBP Compliant
  - Made in USA
COLOR OPTIONS

DESCRIPTION
Powder coating is available on most racks, be sure to inquire with your bike parking specialist.

STANDARD COLORS*

APPLICABLE PRODUCTS
ALL AVAILABLE POWDER COATED PRODUCTS

SIGN PLATE CUT-OUT

DESCRIPTION
Custom sign plates are added to the rack with your logo or design cut-out from the sign plate.

CUSTOM SET UP FEE APPLIES

APPLICABLE PRODUCTS
TOFINO, WESTPORT, OAHU, CIRCULAR RACK, POST RACK, ALL INVERTED U RACKS (EXCLUDES MUNICIPAL RACK)

SIGN PLATE LASER ART

DESCRIPTION
Custom sign plates are added to the rack with your logo or design through a chemical laser marking (CLM) process. Stainless steel sign plate required.

CUSTOM SET UP FEE APPLIES

APPLICABLE PRODUCTS
TOFINO, WESTPORT, OAHU, CIRCULAR RACK, POST RACK, ALL INVERTED U RACKS (EXCLUDES MUNICIPAL RACK)

*CUSTOM COLOR AVAILABLE FOR ADDED COST
BIKE PARKING ACCESSORIES
DELUXE REPAIR STAND

- Tools secured by retractable braided stainless steel cables
- Large area for custom branding/signage
- Designed to directly interface with Public Bike Pump or High Security Bike Pump and Wheel Chock attachments (sold separately)
- Long hose provides wide range of motion without touching the ground
- Impact and UV resistant front plate won’t show wear and tear from pedal strikes
- ADA-compliant design

PUBLIC WORK STAND

- Tool assemblies are spaced to prevent tangling
- Optimized ergonomics to work with all types of riders and bikes
- Designed for indoor or outdoor use
- Secure tool and stand fastening system
- I-beam design eliminates possibility of locking a bike to it
- ADA-compliant design

BIKE WHEEL CHOCHC

- Supports bikes without kickstands while inflating tires
- Tire friction stops roll-back, upright position eliminates trip hazard
- Accommodates tire width up to 2.75" and wheel diameters up to 29"
- Cannot lock bikes to the Wheel Chock
- ADA-compliant design
### PUBLIC BIKE PUMP
- Outdoor-rated stainless steel construction, completely sealed
- Proprietary long-life piston seal and solid pump rod
- Steel braided air hose core prevents cutting
- Dual pump head works on all bikes
- Longer hose available with mounting clip
- Optional tools attached by stainless steel aircraft cable: (2) tire levers and (1) 15mm open end wrench

### HIGH SECURITY BIKE PUMP
- Solid stainless steel piston rod, alloy handle, and smash proof gauge cover provide maximum vandal resistance
- Hose with braided steel core provides protection against cutting
- Choice of two hose lengths
- Universal pump head works with Presta and Schrader valves
- Optional tools attached by stainless steel aircraft cable: (2) tire levers and (1) 15mm open end wrench

### ELECTRIC BIKE PUMP
- Internal compressor supplies air when activated by button
- Quiet operation (<40dB)
- Wall mounted, or optional pedestal for flexible installation
- Worldwide power options (available in 120/240V 50/60Hz)
- Dual pump head works on Schrader and Presta valves
- Choice of two hose lengths with air chuck mounting clip
- Includes spare pump head
**WASH AND FILL STATION**
- Bottle Fill and Bike Wash Station combo
- Works with all types of water bottles and hydration bladders
- Vandal resistant hose and nozzle with stainless steel fittings
- HVLC (High Velocity Low Consumption) nozzle for strong cleaning power without damaging bicycle bearings
- Cleaning brushes attached by braided stainless steel cable to prevent theft
- Requires municipal water and sanitary drain or dry well hookup (check local codes)
- Optional coin operated timer box
- Compliant with ADA, EPA, and Public Law 111-380 (No Lead) requirements

**BIKE WASH STATION**
- Indoor or outdoor installation
- Vandal resistant hose and nozzle with stainless steel fittings
- HVLC (High Velocity Low Consumption) nozzle optimized for strong cleaning power without damaging bicycle bearings
- Vandal proof auto shut off water valve prevents wasted water
- Cleaning brushes attached by braided stainless steel cable to prevent theft
- Requires municipal water and sanitary drain or dry well hookup (check local codes)
- Optional coin operated timer box
- Compliant with ADA, EPA, and Public Law 111-380 (No Lead) requirements

**WATER BOTTLE FILL STATION**
- Free access to drinking water is an essential component of any bicycle trail network or park
- Designed to work with all types of water bottles and hydration bladders
- Vandal proof auto shut off water valve prevents water waste
- Requires municipal water and sanitary drain or dry well hookup (check local codes)
- Smooth laminar flow water filler nozzle and integrated inlet water strainer
- Compliant with ADA, EPA, and Public Law 111-380 (No Lead) requirements
- Designed to vend emergency bicycle repair parts and accessories
- Remote auditing via cellular network allows remote monitoring of sales and inventory data
- Able to vend up to 48 different products
- Planogram of suggested stocking items provided
- Minimal and affordable maintenance
- Indoor or Outdoor models available
- Machine can be customized to accept bills, coins, credit cards, university payment cards, and various types of gift cards
- Modular coil and tray system is highly customizable
- Remote sales and inventory monitoring available
- Able to vend up to 15 different products
- Machine can be customized to accept bills, coins, credit cards, university payment cards, and various types of gift cards
- Vendor sensor guarantees product delivery or refund
- Suitable for indoor or outdoor use
- Available in 10 different colors
- ADA and CE compliant

- The program provides the complete recycling solution including prepaid shipping vouchers and a secure recycling box
- The secure recycling box allows for unattended public tube collection

ABOUT SPORTWORKS

OUR STORY
Sportworks® has been designing and manufacturing bicycle products since 1990. In 1993, we designed our first Bike-Rack-for-Buses™ and currently supply these transit racks to over 500 municipalities throughout North America. In 2011, we developed a line of stationary bike parking products including the revolutionary No Scratch® rack, the first bike rack with a fully integrated, non-abrasive bumper that protects bikes.

At Sportworks®, all of our transit racks meet Buy America requirements and our bike parking products conform to the strict material sourcing criteria of the Living Building Challenge and all of our bike racks qualify for LEED. Our team is dedicated to the continual pursuit of improving how bicycles, public transportation and urban environments work together.

We work with customers and end users to create innovative products that we ourselves as cyclists are happy to use. Our work is dedicated to the improvement of bicycle infrastructure, by bridging the gaps between transportation methods while creating final destination solutions that leave you feeling safe and good about how you commute. At Sportworks®, it’s clear, we are passionate about making the world more accessible to bicycling and we are proud to offer thoughtful, well-engineered products that promote bicycling, healthy lifestyles, and global sustainability.

ADVOCACY
Since inception, Sportworks® has been involved in every aspect of bike-on-bus programs. We regularly consult with transit agencies, community groups, and bicycle advocacy organizations, to continually meet their multi-modal needs. Sportworks® is deeply involved in bicycle advocacy, legislation, sourcing of federal funds, marketing, safety and maintenance, and shaping the general operations of bike-on-bus programs in the transit environment.

MADE IN AMERICA
Our employees take pride in producing exceptionally high quality and cost effective products. All Sportworks® products are manufactured using state-of-the-art technology and proudly made in America.
